

## 07.3-1687 Removing and installing coolant temperature sensor

Operation No. of operation texts and work units or standard texts  
and flat rates:  
07-1687

- |   |  |
|---|--|
| Pressure in coolant circuit .....                           | release by opening cap of coolant expansion tank, close. |
| Plug connection of coolant temperature sensor (X59/2) ..... | pull off, plug in.                                       |
| Coolant temperature sensor (B11/2) .....                    | unscrew, screw in.                                       |
| Seal (arrow) .....  | replace.   |
| Coolant level .....   | check, top up if necessary.                              |

CIS-E control unit fault memory . . . . . read out, erase if necessary (see Diagnosis Manual Engine, Volume 2, Index 0).

**Note**

Stored faults which may originate from test work resulting from cables being disconnected or from a simulation, must be erased in the fault memory after completing the work.
